

Therapeutic Cloning

1. Describe how therapeutic cloning works. *Hints: Donor egg, remove nucleus, cell removed from patient, patient's nucleus -> egg, 'shock', embryonic stem cells used*

2. How would Judson ('How to build a human') benefit from therapeutic cloning?

3. Why does Michael J Fox support embryonic stem cell research?

4. More than 100 million people could benefit from therapeutic cloning. List the types of treatment or procedure it could lead to.

5. Why do some people think that therapeutic cloning is wrong? Give at least two of their reasons.

6. "Christians should support therapeutic cloning." Do you agree? Give reasons on both sides before stating your conclusion.
